

ECC Meeting during 2007 APS-DPP  
Thursday, November 15, 2007

Attendees:

Dan D'Ippolito  
Dave Schultz  
Arnold Kritz  
Glenn Bateman  
Jim Terry  
C.S. Chang  
Phil Snyder  
Tom Rognlien  
Troy Carter  
Scott Kruger  
Daren Stotler

Plans for 2008 TTF Meeting:

After some discussion, it was agreed that the ECC workshop should be on "Scrape-Off Layer" flows. One session will be held jointly with TTF, and one session will be held on Friday afternoon.

Discussion then centered on how to separate the sessions.

There are three main areas:

- o Experimental results
- o Validation: Experimental-Code comparison
- o Coupling to the core

Action item: Tom Rognlien will discuss joint session with Rich Groebner.

This discussion will lead to a decision on how to separate the sessions.

Bylaws:

Dan D'Ippolito pointed out that there was a typo in the proposed revised By-Laws. Tom Rognlien agreed that a typo had occurred in the distributed revised version. The revisions were not affected by the typo. The corrected revised bylaws, with typo fixed were approved unanimously.

New website at Lehigh:

Arnold Kritz passed around a draft of the top page of the website.

- o Phil Snyder pointed out a typo in title.
- o Jim Terry suggested new graphics and some discussion ensued on that topic
  - Some sensitivity is needed here regarding favoring one code over another
  - People asked to send suggestions to Arnold

- o Lehigh is checking into registering a URL.
- o The ToDo list on the website is outdated
- o Discussion of communication
  - Wiki vs. discussion forum vs. email
  - Seemed to be resolved in favor of email

APS mini-symposia post-mortem:

- o Tom Rognlien and Darren Stotler will give PDF's of presentations to Arnold to post at Web site pending authors' approvals
- o A summary could be published in Physics of Plasmas
  - Need to get copies of all of the presentations
  - Deadline in January?
